An Apple a Day Keeps the Doctor Away

An apple is a delicious and crunchy fruit. Its shape is round and it varies in color from red to green. Apple trees are also varied. Some kinds of apple tree are small and some others are big and may reach the height of 5 to 10 meters.

An apple tree usually takes 5 to 6 years to produce its fruit. Apple trees should grow best in tropical areas.

An Apple a Day Keeps the Doctor Away

An apple is one of the most popular fruits for its rich nutrition. It is also well-known as a fruit with antioxidants. The nutrition and antioxidants are good for our health.

That is why there is an old saying: an apple a day keeps the doctor away. It does not mean we should eat one apple each day. It means that to keep healthy, we must eat healthy food.
